

Waste Chute cleaning and Maintenance Presentation

Hygienic waste chute systems form a very important part of a well-maintained building. Regular cleaning and odour control of the waste chute systems are essential to maintaining healthy hygiene standards.

Waste Chute Cleaning Man has developed an odour control and cleaning process that will maintain healthy hygiene standards in and around your waste chute area.

Waste Chute Cleaning Man services residential and corporate high-rise waste chutes, incorporating a high-pressure cleaning, environmentally friendly waste chute cleaning process. The process includes cleaning of waste chute doors, barrel of the waste chute and also importantly bottom of the waste chute which can also include the compactor. Our specially designed Odour Control Foaming of the bin room ensures the odour is eliminated from the bin room.

Waste Chute

Bottom Chute Entry

Our goal is to provide an exceptional service which thoroughly cleans and protects waste chute surfaces from dangerous bacteria and germs. Also, to use our range of custom commercial grade odour control solutions to ensure that the waste chute is left smelling pleasant for a long time to come.

We can organise a program for waste chute cleaning, bin cleaning, waste chute maintenance and odour control solutions package.

Waste Chute Compactor

Waste Chute Door

Odour control

One of the requirements of high-rise tenancy is continual contact with waste chutes which are used to dispense apartment holders rubbish to a central location on the ground. If not maintained the waste chutes create hygiene and odour problems for the tenants and the surrounding area.

Waste Chute Cleaning Man can arrange a structured hygiene and odour control plan that protects tenants and the building of horrible waste smells and unhealthy hygiene in and around waste chutes. If not maintained these waste areas attract unwanted pests that create other problems for all users.

Note: WBCM Environmental Australia cleaning process includes a floor by floor cleaning of waste chute that give us the ability to visually see what we clean.

The Waste Chute Cleaning Man has become the premier Waste Chute Cleaning service in Australia since its inception in 2003.
