

Welcome to WBCM Environmental Australia.

Our goal is to improve the health, hygiene and sanitary conditions of all Australians, both domestically and commercially through quality service provision and ongoing product development.

Being a proudly Australian owned and operated business since 2003, WBCM Environmental Australia has grown from a "one truck, home business" to a multi-platform business providing a range of different services and products within the field of health, hygiene and sanitation. Our services include hygienic bin cleaning and deodorising, odour control solutions, toilet hygiene, and high-rise apartment waste chute cleaning. We develop health and hygiene technologies that deliver sustainable outcomes for our clients and enhances the environment we live in.

Our core values

We care for our customers and our team

We work with integrity

We are passionate about what we do and how we do it

We respect and care for our environment

Why choose us?

Since 2003 WE have continually improved our cleaning/hygiene processes ensuring people's health and general hygiene stays paramount in our developmental process. WE have also introduced an industry leading in house operation and customer service program.

WE are big enough to service multi-venue, multi-year contracts but small enough to address the annual residential clean.

WE cover 100% of metropolitan Melbourne and attend to regional Victoria upon request

WE educate our staff constantly, updating them on "best practice"

WE confirm your clean prior to the cleaning day as communication to our customers is a strength of our service delivery.

WE continue to improve our operational process to ensure outstanding customer satisfaction.

"Providing Solutions" is our Mantra

WBCM Services

Hygienic bin cleaning and deodorising

Odour control solutions

Toilet hygiene

High-rise apartment waste chute cleaning
